HIMANSHI BISHT

Full-Stack Web Developer | AI Integration

Nainital, Uttarakhand, India | himanshibisht25@navgurukul.org | +91 9045036472 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

BCA student building full-stack JavaScript applications with React, Node.js, Express, MongoDB, and REST APIs. Shipped projects including an e-commerce web app with Context API state management, an Agile issue tracker powered by TanStack Query, and an AI-integrated Q&A app built on the Gemini API with a secure Express backend. Comfortable across the stack, from responsive React UIs and client-side routing to Express route handlers and third-party API integration. Strong problem-solving, communication, and teamwork skills.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+, DOM), React, React Router, Context API, useReducer, TanStack Query
- **Backend:** Node.js, Express.js, REST API Design, MongoDB, Mongoose, SQL, Python3
- **Tools and Practices:** Git, GitHub, Vercel, Axios, Postman, VS Code
- **AI and Integrations:** Gemini API, REST API Integration, Environment Variables (.env)

PROJECTS

Ask Gemini – AI Question & Answer App | Live Demo

Tech Stack: Node.js, Express.js, Gemini API, dotenv

- Built a full-stack AI-powered application that lets users submit questions and receive generated responses from the Gemini API.
- Developed backend REST API routes using Node.js and Express.js to handle request/response data and asynchronous API integration.
- Secured API credentials server-side with environment variables and used async JavaScript with fetch() for API calls.

Velora – E-Commerce Web Application | Live Demo

Tech Stack: React.js, React Router, Context API, useReducer, Axios

- Developed a responsive e-commerce application with product listing, product detail, and checkout pages using component-based architecture.
- Implemented client-side routing across multiple views with React Router and centralized cart state using Context API and useReducer.
- Integrated external APIs using Axios for dynamic product data fetching, with reusable UI components across the application.

Agile Issue Tracker | Live Demo

Tech Stack: React.js, TanStack Query, JSON Server

- Built a web-based issue tracker with an Agile-style board across Todo, In Progress, and Done workflow stages.
- Implemented full CRUD ticket management with TanStack Query for efficient server-state management and API data fetching.
- Designed a structured, responsive dashboard using reusable components, with JSON Server as the development backend.

EDUCATION

Bachelor of Computer Applications (BCA) | Present

Eternal University, Baru Sahib

CGPA: 8.9/10 in first semester, 9.15/10 in second semester

CERTIFICATIONS

- MongoDB Aggregation Fundamentals – MongoDB / Credly (2026)
- React Bootcamp – Zuvy (August 2026)
- Python Certificate
- CodeChef Certificate

LANGUAGES

Hindi, English
